LUKAS TUCKER FRÖLING

FULL-STACK SOFTWARE ENGINEER · CLOUD & DEVELOPER PLATFORMS

Stockholm, Sweden · +46 72 177 74 62 · tuckerlukas@gmail.com
linkedin.com/in/lukastuckerfroling

PROFILE

Product-minded software engineer with 5+ years of experience building customer-facing products, developer platforms and cloud-based services. Strong in React, TypeScript and Next.js, with hands-on experience across backend automation, API platforms, CI/CD, infrastructure and production observability. Comfortable owning features from early exploration through delivery and operation.

EXPERIENCE

FORTUM

Software Engineer · Stockholm · Jun 2023–Present

- Build and evolve Fortum's customer-acquisition platform across Nordic markets using Next.js, React and TypeScript, with a focus on scalability, accessibility and maintainability.
- Own customer-facing features end to end, partnering with product, design, backend and regional teams to turn business needs into production-ready experiences.
- Designed an **AI**-assisted invoice-scanning MVP using Azure Document Intelligence to extract electricity-meter information and reduce manual input during onboarding.
- Developed reusable frontend architecture and shared components used across teams and markets, with Contentful powering configurable and localized content.
- Contributed to Azure-hosted production infrastructure using Docker, GitHub Actions and infrastructure-as-code tooling.
- Improved production observability through Datadog RUM, logs, error tracking and monitors, making incidents easier to detect and diagnose.

TELIA COMPANY

Software Developer · Stockholm · Mar 2021–Jun 2023

- Developed self-service experiences that enabled internal teams to create, manage and publish APIs through Telia's developer platform.
- Built backend automation with AWS Step Functions that generated GitHub repositories from templates and orchestrated API delivery workflows.
- Created CI/CD pipelines for publishing API proxies to Google Cloud Apigee and API specifications to the Developer Portal.
- Contributed to an API catalog organizing ownership, metadata and documentation for internal and external APIs.
- Led a team of KTH students from initial discovery through delivery of a developer-experience improvement project.

EASYNOTE

Software Developer Intern · Stockholm · Nov 2020–Feb 2021

- Improved the performance and maintainability of a Vue application through debugging and component refactoring.
- Built a React Native mobile application with feature parity across web and mobile experiences.
- Developed a cross-platform desktop application using Electron.

TECHNICAL SKILLS

Frontend TypeScript, JavaScript, React, Next.js, Vue.js, React Native, Electron
Backend & APIs Node.js, GraphQL, REST APIs, API gateways, Apigee, AWS Step Functions
Cloud & infrastructure Azure, AWS, GCP, Docker, Kubernetes, Terraform, Bicep
DevOps & observability GitHub Actions, CI/CD, Datadog RUM, logging, monitoring
Quality & platforms Playwright, Jest, Storybook, Contentful, Drupal, accessibility
AI Azure AI Foundry, Azure Document Intelligence, AI-assisted product development

PROFESSIONAL TRAINING

- Developing APIs with Google Cloud’s Apigee API Platform · Jan 2023
- Managing Google Cloud’s Apigee API Platform for Hybrid Cloud · Jan 2023
- Architecting on AWS · Apr 2022
- Developing on AWS · Apr 2022
